

Reused flooring waste reduced Adapteo's carbon dioxide emissions by 33 tonnes

In 2020, the flexible real estate company Adapteo initiated a collaboration with the floor manufacturer Tarkett to reuse of the waste that arises during the production of floors for Adapteo's buildings. Since then, more than 8.7 tonnes of material have been recycled by Tarkett, corresponding to a reduction in carbon dioxide emissions by almost 33 tonnes.

Adapteo's business is based on a circular business concept. Its buildings are flexible and optimized for the needs that arise. The buildings are reused multiple times, without compromising on indoor environment or quality.

Tarkett is Adapteo's main supplier of flooring, and the collaboration between the companies goes back several years. Since 2020, Tarkett collects all flooring waste that generated in Adapteo's Swedish production, reusing it in the production of new floors. This saves material and reduces carbon dioxide emissions.

“The collaboration with Tarkett is a clear example of how we want to work together with our suppliers to reduce our environmental impact. It is about identifying new opportunities for the reuse or recycling of as much as possible in our buildings,” says Hanna Wennberg, SVP Marketing, Communication & Sustainability at Adapteo Group.

Every tonne of recycled flooring waste means a reduction in carbon dioxide emissions by 3.7 times as much. Since the collaboration began, 8.7 tonnes of material have been reused or recycled by Tarkett, which corresponds to reduced carbon dioxide emissions by almost 33 tonnes.

Adapteo in brief

Adapteo is a leading flexible real estate provider in Northern Europe. We build, rent out and sell adaptable buildings for schools, daycare centres, care, offices, accommodation and events. We know that our society will go through an immense change in the years to come. Whatever the future brings, we believe that adaptability is the best solution. With our buildings, we can transform, repurpose, scale up and scale down in a matter of weeks by using a modular and circular building concept. Our buildings can be used for a few days or indefinitely, always optimised for current needs. That is how we build adaptable societies.

Adapteo is listed on Nasdaq Stockholm and operates in Sweden, Finland, Norway, Denmark, Germany, and The Netherlands. In 2020, Adapteo's Net sales were EUR 231 million.
